

## Know Your Traffic Laws

Prepared in Cooperation With the  
Torrance Police Department

Traffic Box Score (As of March 1)	
Fatalities	5
Injury Accidents	80
Persons Injured	124
Non-injury Accidents	101

\*Box score of all accidents investigated by  
Torrance Police Department since Jan. 1, 1961

This past February has been one of the bloodiest months in the history of the Torrance Police Department, according to Lt. Donald Nash, head of the department's Traffic Division.

During the short month, three persons were killed, 41 injury accidents were logged with 71 persons injured, and an additional 44 property damage accidents were recorded.

Two of the three fatalities have not been carried on previous Torrance logs, but were added this week after investigation by Los Angeles County Sheriff's deputies determined that an accident claiming two lives on Redondo Beach Blvd. were within the city's jurisdiction.

Although speed is a factor in almost all traffic accidents, too many times speed was not the actual cause of the crash, Lt. Nash reports.

Failure to yield right-of-way at intersections, and with vehicles leaving private driveways, roads, or from private property are among the more serious and frequent causes of accidents.

To answer the question, "Who has the right-of-way?" the Traffic Division of the local police department has set down the following tips:

1. Controlled intersections—Any vehicle that has entered the intersection on the green signal and is delayed within the intersection has the right-of-way, and all other vehicles shall yield right-of-way to allow the vehicle to leave the intersection.
  2. Uncontrolled intersections—When two vehicles enter an intersection from different highways at the same time, the vehicle on the left shall yield the right-of-way to the one on his right.
  3. Left-turner at an intersection—The driver of any vehicle intending to turn left at an intersection shall yield right-of-way to any vehicle approaching from the opposite direction which is so close as to constitute a hazard at any time during the turning movement.
  4. Entering onto a through highway—All vehicles shall stop at the entrance to a through highway and yield right-of-way to vehicles approaching on the through highway which are so close as to constitute a hazard.
  5. Yield signs—Any vehicle approaching a "yield right-of-way" sign shall yield to all vehicles within the intersection or approaching so close as to constitute an immediate hazard.
  6. Leaving private road or driveway—Any vehicle about to enter or cross a highway from any private property or private road or driveway or from an alley shall yield to all vehicles approaching on the through highway.
- All motorists are cautioned by Traffic Division officers that being discourteous in driving and use of poor judgment is one of the greatest causes of right-of-way violations which result in traffic accidents.

"Remember, be a courteous driver," the officers warn.

## Official of Local Chemical Firm Participates in Stanford Affair

John Stauffer, son of the founder of the Stauffer Chemical Co., and principal donor of a new chemical building for the Stanford Campus, participated recently in an "International Chemistry Symposium" on the campus which drew outstanding chemists of the Western world.

The occasion marked the dedication of the new \$800,000 John Stauffer Chemistry Building, Stanford officials said.

J. E. Wallace Sterling, president of Stanford, attended the sessions as did other officials of the Stauffer Chemical Co. Among the outstanding scientists at the symposium and dedication were Sir Alexander Todd of Cambridge University, 1957 poet laureate; and 13 distinguished lecturers from eight nations, including the Soviet Union.

Prof. Carl Djerassi and Prof. William S. Johnson of the Stanford chemistry department were principal hosts; Both are well known in local chemistry circles.
